

Potnuru Jyothsna Chandrika

jyothsna2k4@gmail.com — +91-7396558402 — Visakhapatnam, India

Summary

Resourceful Electrical and Electronics Engineering graduate from Andhra University with a proven track record in practical project execution and internship experience. Brings strong proficiency in Java programming, SQL, Operating Systems, DBMS, MATLAB, and PLC programming for simulation and automation tasks. Delivers results by combining analytical problem-solving abilities, technical expertise, and adaptability within core engineering and software development environments. Capable of collaborating in cross-functional teams and integrating advanced technology solutions to drive operational excellence.

Experience

Management and Procurement Intern

Nov. 2024 – Jan. 2025

Chandra Electricals, Visakhapatnam, India

- Assisted in inventory management by analyzing demand patterns and restocking runner and slow-moving items based on delivery lead times, ensuring optimal stock levels.
- Worked with cross-functional teams to enhance order fulfillment processes, minimizing delays and ensuring contract commitments were met.

Substation Intern

May 2024 – June 2024

APEPDCL Substation (33/11 KV), Visakhapatnam, India

- Assisted in inspecting and testing electrical equipment and switchgear.
- Monitored and recorded operational data, aiding in power outage analysis.

HMI/SCADA Troubleshooter Programmer

Dec. 2023 – Feb. 2024

Jindal Stainless Limited, Visakhapatnam, India

- Developed HMI/SCADA screens for hydraulic press optimization.
- Resolved software-related issues to minimize downtime and improve productivity.

Content Creation and IT Support Intern

May 2023 – Oct. 2023

SHL (Social House Learning), New Delhi, India

- Assisted with event coordination and managed social media content.
- Organized competitions to promote student engagement and innovation.

Embedded Systems Intern

Sep. 2023 – Oct. 2023

Teck Team Solutions, Visakhapatnam, India

- Gained hands-on experience in embedded systems focusing on Arduino applications.
- Developed projects on home automation, smart car parking, and automatic irrigation systems.

Project

Distributed Caching System

Designed and implemented a Java-based distributed cache with RESTful APIs, featuring TTL-based expiration, LRU eviction, and thread-safe operations using. Applied consistent hashing for key distribution across multiple cache nodes and explored strategies for cache warmup and stampede prevention. Documented the system with detailed architecture and sequence diagrams to demonstrate scalability and fault-tolerant design.

Technical Skills

- **Interpersonal Skills:** *Project Management, Analytical Thinking , Strong interpersonal Communication, Problem Solving Ability*
- **Core Skills:** *JAVA , Operating Systems,DBMS, SQL, Embedded Systems, Excel*
- **Certifications:**
 - *Software Engineering:JP Morgan Chase Co.*
 - *Corporate Finance:IIMBx*
 - *Operations Management by Oxford Home Study Centre*
 - *Understanding Credits and Debits by Oxford Home Study Centre*
 - *SQL by IIT Mood Indigo*
 - *Basics of PLC (APSSDC Siemens Centre)*

Education

Andhra University College of Engineering(8.07 CGPA)

Bachelor of Technology in Electrical and Electronics Engineering

2021 – 2025

Resonance Kota (CBSE – 93%)

2019 – 2021

St. Joseph's Girls' High School (ICSE – 93%)

2009 – 2019
